Board Members Attending: Nick Ecker-Racz, Keone Maher, Nash Basom

Visitors: Adam Heuslein, Sue Gibeault, Mark Wright, Gary Leach

Minutes of 6 February 2008

Approved without changes.

Roads

Adam Heuslein and Sue Gibeault would like to have clarity about what Glover's emergency services can expect in the way of support from the town's road crew when they have difficulty getting to the location of an emergency. It is our desire to support our emergency services in any way we can. There are times when what is needed is beyond our ability, or the time lapse between a request to the road crew and when they can arrive will be as long as an hour (it depends on where our trucks are at the time help is requested and whether or not they have to load sand before responding). We encouraged Adam to call Andy directly rather than going through a select board member or the town clerk. Adam indicated they have acquired chains for the ambulance. The select board indicated a desire to have all members of the road crew equipped with Unicel cell phones to improve communications between each other and with the ambulance squad.

Adam and Mark reported that the working relationship between the ambulance squad and the fire department has never been better.

This being Nick's last select board meeting, Both Adam and Mark indicated that they were present because they wanted to thank Nick for his many years of service to the town and his support of our emergency services!

Glover Sewer System

Gary Leach reported that he has met with Bill May concerning the easements for the West Glover project. As required, he will be sending a letter to Vt. Agency of Natural Resources outlining the current plan and responding to the 1272 order. There are still

some unanswered questions re the best option within West Glover village. Using the existing gravity system within the village may be possible. Gary will attempt to have answers to those questions before Town Meeting.

Municipal Building Water

It seems we need to install a filter in the water line for this building due to the poor taste (sulfur).

Miscellaneous

Other routine clerical and administrative matters were attended to.

Adjourned at 8:20pm.
