

Glover Town Planning Commission Meeting
March 16, 2017

The meeting was called to order by Randy at 4:03 PM. Mariel, Randy, Jim, Ann C., Ann L., Carmela and Liz were present.

Mariel moved to correct the spelling error of Ann C.'s name in the minutes of the March 2, 2017 meeting and then the minutes were approved.

We had a discussion of the energy growth movie, "Growth Busters" to be shown on Sunday, March 19th at the Town Hall. Randy said he would announce it at the Glover Library Talent show on Saturday.

Jack wrote a document defining how to use the following words. Goals: broad primary outcome, Strategies: how to achieve the goal, and objectives: the measureable step.

Randy and Mariel are continuing their review of the document to clear up the red and green sections (earmarked for further revision) and they are making good progress. Mariel thinks the appendices are in good order also.

Energy section: Ann C. has the long document—guidance for the Regional Energy Planning Standards. Jack could send a copy out to us all. We need to read it to see if it is what we want. Then we can have some input but we have to work towards achieving those goals.

Ann C. will send solar and wind maps to Randy and then he on to us.

The Hazard Mitigation Committee received a grant to hire a consultant, Paul W???, to review, correct and add proper language for FEMA.

He did the review and Jack and Ann L. presented it to the Selectboard, they will read it and approve it and then send it on to FEMA. We will put it into our plan once it is approved by FEMA. Jack thinks that this should be in the body of our document.

We worked on refining the red parts and some of the language of the Town Plan.

Our next meeting will be March 30, 2017 at 4 PM in the Glover Library.

Ann C. moved to adjourn and Jim seconded. So voted.

Respectfully submitted,
Liz Nelson
