

Glover Energy Committee Meeting 11/1/21

Attendees- Jack, Sara, Mariel, Ann, Angela

Window Dressers workshop a success, 176 windows completed and a few rewraps. 11 Glover residents and 11 from surrounding towns

Takeaways- scheduled breaks and having the food downstairs in a separate area is good, helps with the community bonding and more relaxing. We had a good amount of food, not too many leftovers. Schedule catering earlier in the workshop so if we finish early we aren't wasting time and money. Need to work on sharing the load for organizing. So many emails!!!!!! Maybe have one person enter customer data and then someone else do the measuring.

Talked about maybe doing every other year or focusing on other towns if we don't have many people in Glover left who are interested. Would also be nice to get more people involved either in Glover or surrounding towns.

Jack assisted with Sutton workshop which went well, they had to improvise with some of the jigs due to low ceilings but it worked.

Will have a meeting with surrounding energy committees maybe next month to discuss maybe joining together for window dressers and that way we would have more volunteers and could split up the work more equitably.
