

Glover Energy Committee February 18th 2025

Attending: Mariel, David, Sara, Ann, Angela

Guest- Bill Chidsey

Bill's recommendations;

Have MERP weekly goals

As-Built heating- cooling- ventilation load calculations done by engineer or contractor

Utility Engineering [pre- construction] applications probably need to upgrade the transformer for the Town Hall

Energy Committee design / build or spec / bid work

Assessment reality check- check with BGS on clarification

Common Sense Glover work-scopes what makes sense

RFPs- maybe doing it not by building but by;

General Contractor for all three buildings or by individual building or by trade

Energy Committee roles and responsibilities ie accounting and decision making

Contractor Assistance

BGS Q&A review recommends contacting Doug Wells

E-VT rebates & grants- point of sale rebates are valid additional ones are available based on specific review from EVT

VT DFS and VOSHA- do we have permits and if not need to make sure the contractors do and if there is asbestos or lead the building owner needs to notify people, follow up with Cindy and Theresa
