

Glover Energy Committee Meeting May 21st

Present: Sara, Ann, David, Mariel

David brings in the Thermal Energy Camera and two infrared thermometers and we familiarize ourselves with them. We will develop instruction sheets to go out with them. David will look for good videos that help educate re use.

Toni will start loaning out infrared thermometers through the library within the next few weeks.

Dr, Blake cancelled out on meeting with Ann and Mariel to discuss VEEP program for our school and/or community. She hopefully will reschedule. VEEP might have some funds that will help support having them come to our school/community.

EV Bikes have not been going out yet. Sara and Toni are putting a note on FPF to advertise our bikes. David will come in on Wednesdays to service bikes

Allie Webster from NVDA will be hosting NEK Energy Network on June 4th at noon. Join Zoom Meeting <https://us02web.zoom.us/j/84526248341>

Brainstorming small steps to conserve energy in one's home:

- We question whether putting caps on chimneys could be a tiny step to saving energy.

Question whether NETO is still offering free efficient stoves to folks who meet the financial guidelines? Ann will look into this.

Discussion of chimney sweeps and see if any would do a bunch of folks in Glover. Sara will research.

None of us were able to attend the window insert measuring webinar. We will try to get access to the online presentation.

Next meeting will be June 4th at 4 at the library. Debbie New from TENS (Thermal Energy Networks) will join us by zoom to talk about geothermal options. Angela will send out a zoom link for her.

Respectfully submitted by Mariel Hess in absence of Angela Daniels
