Glover Energy Committee Meeting Minutes 5/4/2026

Present: Sara Gluckman. Ann Creaven, Mariel Hess, Angela Daniels (on zoom)

Guests: Amy (from Spates - on zoom), James Coe (on zoom), Olivia Noel (on zoom)

MERP update - Per Amy from Spates and James, work will begin the first week in June if all goes well. Work will probably be starting at the Fire Station. Windows ordered for the Town Hall should be coming by end of May. As for the work that the folks at the Fire Station have requested - that needs to be coordinated with Spates work - we will be asking for a "Change Order" for those, submitting that to Spates - who will then do the work but will bill the Fire Station separately from their MERP work.

E-Bikes - Now available at the Glover Library to rent. Sara will advertise on FPF, and in The Chronicle.

Window Dressers - We have been invited to table at Brownington Energy Fair Saturday May 30th from 9-3pm. Jack Sumberg has agreed to take the morning shift. Mariel and Ann will take the afternoon shift. Measuring for inserts will hopefully begin before the end of May. Ann and Mariel will coordinate schedules to do this.

Glover Town Website improvement project - Olivia Noel has generously offered to work on this for the Town, and asks for input from us - as she has from other Glover Town committees and entities. She is particularly looking at what, how, and where things are stored, and how they can best be accessed and shared in as user friendly a way as possible. We suggest that each committee/entity should have its own email access and zoom link. We would also like to see zoom links to committee-related resources, programs/events, educational opportunities, merchandise if available, photographs, other? We raise question as to whether website use can be tracked.

Town Plan Update - Energy Chapter - Work on this postponed until future meeting

Next EC meeting - Monday, May 18, 2026 at 4:00 pm

Submitted by Mariel Hess, EC Member
