

Glover Energy Committee Meeting May 7 2024

Attending- Mariel, Ann, David, Sara, Angela

E-Bikes- Bikes are coming down tomorrow 5/8/24

Window Dressers - Our workshop will be 10/31 through 11/6. Need to start outreach again. Mariel will reach out to the OCSU Facilities Committee to see if any of the schools could use them.

VEEP Programs - Mariel and Ann working on finding out what is available and then will report back to the group and reach out to Glover School or the OCSU school district to see if we can coordinate something with them.

Thermal Energy Networks - Debbie Now, coordinator of Vermont's Community Thermal Network said she would join us via webex to talk about it. Probably cost prohibitive but the State is supporting it so should look into to find out if there is funding available and how it all works. Ann will reach out and try to schedule her for our next meeting.

Sara got some flyers from Heat Squad, the income minimums have increased so more people should be able to utilize it.

\$ave Energy NEK- Did a raffle for a \$600 energy audit at their "Ask the Expert" weatherization event on 3/19/24 - and split the cost among 4 participating town Energy Committees - Glover being one of them - \$150 each. We used our MERP \$4000 Mini Grant to pay our part.

Thermal Camera and Laser Thermometers - David will give the info to Cindy and she will order - using our MERP Mini Grant, one infrared camera, and two laser thermometers, one for Glover Day give-away and one to have to loan out to people through the library.

MERP - no news at this point

Next Meeting - Tuesday May 21st at 4pm at Glover Library
