

7/2/24 Glover Energy Committee Meeting

Present: Ann Creaven and Mariel Hess

Noted and appreciated the Instruction Sheet that David prepared to accompany the Thermal Imaging Camera that we will be lending out through the Glover Library.

Still no information about MERP grant other than application for the \$500,000 grants will not be available until all the energy assessments have been completed and reports received by the participating municipalities.

E-bikes are back in circulation after their winter hibernation.

Time to begin focusing again on getting word out about window inserts. Jack said he would put something out on Front Porch Forum.

We propose at our Glover Day table having a jar for folks to put their name in for a drawing for one Infrared Thermometer and four window inserts - a total of five drawings. We thought this would be preferable to coming up with a gift basket.

Next meeting Tuesday, 7/16/24, at Glover Library.

Respectfully submitted by Mariel Hess, in Angela's absence
