

Glover Energy Committee Meeting July 21st

Attending: Mariel, Ann, Sara, Angela

MERP- Coe's coming to next meeting, said they would like to put out a bid request for the proj, We are wondering if we need to get approval from MERP for the changes before getting bids. Will send them an email to ask. Mariel to work with Cindy on the MERP financial report.

Window Dressers - one more window to measure, we will all try to volunteer for at least one session

E-Bikes- Question from community member about a daily rental, probably not realistic as we would need to have someone available to check them in/out and it would be a bigger time commitment then we can make

Energy Plan- Need to review before the Town Plan is updated in 2026. Need to reach out to NVDA about what is needed to update the enhanced energy plans or what the guidelines are. Also need to find out if changes in the legislature and their goals have an impact on updating our enhanced energy plan?

Next Meeting- August 4th
