

Glover Energy Committee Meeting Monday August 30, 2021

Attendees- Sara, Ann, Angela, Jack

Solar Project- nothing to update

Window Dressers-

Measuring is almost complete, Jack waiting to get any other requests and then will have probably one more day of measuring. Concerns that we may have to cancel the workshop based on resurgence of Covid-19 but we will see what happens. Discussed the lunch breaks and will do premade meals rather than platters of food. Will need to work out how to stay distanced during lunch or hope for nice weather and we could eat outside.

Jack will send the sign up email to participants to pick times to help with assembly with Angela's information for them to contact with any issues.
