

GLOVER SELECTBOARD MEETING NOTICE

STAKEHOLDER INPUT REQUESTED @ 11/9 Glover Selectboard Meeting: Town Offices/Library & Community School Green Stormwater Treatment Concept Plans

Patrick Hurley (Memphremagog Watershed Association) and Holly Greenleaf (Greenleaf Design LLC) will present multiple proposed retrofits at a few locations around the Town Offices/Library and School to improve stormwater runoff treatment, reduce flooding and erosion, and expand naturally vegetated river buffers to protect water quality in the Barton River while also providing aesthetic and educational amenities for the community. They are looking for stakeholder input at this stage of the design process to rate the proposed concepts and provide preferences or insight on aesthetics, size/shape/location/plant type, maintenance concerns and functionality in order to better develop retrofits that work for the Glover community. They would greatly value your feedback - this is the best time to weigh in! If you are not able to make the meeting, the presentation and a 'scorecard' will be shared to write in your feedback and send in.
