

Glover Energy Committee September 11, 2023

Attending: Sara, Ann, Dave, Jack, Ang, Mariel

Guests: Emma Harter of 350 vt and Kevin Gregoire Craftsbury Energy Committee

Emma is interested in issues specific to the NEK that maybe we can collaborate on. We discussed the projects that we have been doing since 2016. Window Dressers, MERP, ebike loan program, Solar Array in W Glover, button up, energy upgrades to town buildings, etc.

350.org is looking to review and or change the VT Renewable Energy Standard because they say it isn't really doing what it was meant for, i.e. large scale biomass (called renewable under the present Standard) is just as bad as fossil fuels. They will be having info sessions to try and spread the word and get communities involved.

Ann brought up wind towers potentially being installed at Auger Heights, concerned about sound and how to find out more about it.

Respectfully submitted,
Angela Daniels
