

Glover Energy Committee Meeting April 18 2022

Attending- Angela, Jack, Ann, Sara, Mariel

Ann, Sara and Mariel will do some door to door promotion of efficiency programs, Ang to try and get handouts and flyers from NETO when she meets with them to go over window dressers.

Norwich Solar has not updated the necessary language in the agreement so the select board was not able to sign off on it. Hopefully they will have it updated and back to us before the next select board meeting which is on 4/28. Norwich has submitted a new service application to VEC so that part of the process has been started.

Window Dressers- Not much relating to us, but an organization from Delaware reached out to Window Dressers about duplicating the process there but could be some challenges surrounding software. They will be having a meeting to discuss later this week. The Board of Window Dressers has a few people that are retiring and so there are new board members joining and they are geographically spread out, VT, NH and ME now.

NEK CUD- [nekbroadband.org](http://nekbroadband.org) is their website, they are working on building out their middle mile fiber and minimal last mile fiber to the home.

Glover Day is happening so we should have a table or something for a presence there. That will be on Saturday July 30th.

Sutton Energy Fair is on May 14th.

Window Dressers Community Build will start Friday 10/21 with picking up the materials and then Saturday putting frames together.

Next meeting will be on Monday, May 2nd via zoom, unless otherwise notified.
